(a) gradient variance vs. entanglement, $n = 12$
$S_{n/2}$ / Page
variance / Haar
ratio to Haar value
depth L
(b) entanglement of $U(\theta)|0\rangle$
L = 2
L = 5
L = 10
L = 20
L = 50
Page value
half-chain entropy $S_{n/2}$ (nats)
qubits n
