(a) preparing $|0\rangle^{\otimes n}$ with Adam
final fidelity $|\langle 0|\psi\rangle|^2$
qubits n
global cost, exact gradients
global cost, 10000 shots
local cost, exact gradients
local cost, 10000 shots
(b) initial gradient norm vs. outcome
final fidelity
$\|\nabla C\|$ at initialisation (exact)
global, exact
global, shots
local, exact
local, shots
